Over the last several months, the UT Safety & Health Committee, Safety & Health Department and Facilities Maintenance Department personnel have completed a campus-wide risk assessment to determine the best location in each Main Campus building for a tornado safe waiting area. The risk assessment entailed a cross-disciplinary team of experts surveying each of the 65 Main Campus buildings, its features and layout, to determine where to locate that building's "Tornado Safe Waiting Area" sign(s), which clearly identify where that building's occupants are to congregate in the event of a tornado warning.

Listed below are the tornado safe waiting locations for Main Campus buildings, listed alphabetically.

When you hear Lucas County emergency sirens blowing, IMMEDIATELY stop what you are doing and go to the tornado safe waiting area in your building. Please note that there are "Tornado Safe Waiting Area" signs posted near/at each location listed below.

Please contact Gary Jankowski, Associate Vice President of Safety & Health (383-3768), if you have questions in this important safety matter.

TORNADO SAFE WAITING LOCATIONS
FOR UNIVERSITY OF TOLEDO MAIN CAMPUS BUILDINGS

NOTE: For the Health Science Campus, when a Code Gray Phase II is announced, go to the ground floor (basement) of whatever building you are in, and await the announcement of an "all clear.

**The only exception to this rule is for Dowling Hall, where the ground floor (basement) has glass at the west end of this floor. Persons in Dowling Hall should take refuge either on the ground floor (basement) of Health Education Building or the ground floor (basement) of the main Hospital, the two buildings attached to/closest to Dowling Hall.
